TACTI

**Adjustable rear sight
with pre-set range guides
at 50, 100, and 200 yards. Its
unique 24½" sight radius provides
increased accuracy at distances
beyond 100 yards.**

**Buttstock removed instantly
by pushing the
stock release button.**

NEW

DEMIRO

**A unique muzzle brake
reduces recoil to a minimum.**

**Solid walnut grips,
forearm and buttstock.**

A Highly Advanced Weapon System from DEMRO.

The TAC-1 Carbine is a sophisticated weapon system designed to meet the needs of professional law enforcement, security and military personnel, as well as citizens who require or desire a hard-hitting compact carbine for home protection or recreational use.

Made entirely in the U.S.A. from premium steels and materials, the TAC-1 Carbine fires from an open bolt for safety and rapid cooling, preventing premature ignition (cook-off) of a chambered round.

Chambered for 45 ACP or 9mm Parabelum, the TAC-1 Carbine features a unique muzzle brake for reduced recoil, and a 24½" sight radius for pinpoint accuracy at distances beyond 100 yards.

The TAC-1 can be field stripped in a matter

of seconds without the need for special tools. The buttstock can be instantly removed, and incorporates a built-in magazine loader.

Three positive safeties block the sear; a conventional thumb safety, a grip safety allowing operation only when depressed by the web of the thumb when firing, and a patented combination lock safety which permits operation of the carbine only when set to a predetermined number.

The TAC-1 Carbine is one of the most reliable, and safest 45 caliber carbines on the market. There are no exposed screws, nuts or pins to loosen or fall out. Its light weight and minimum recoil contribute to making this one of the most advanced and effective systems ever developed.

**Three positive safeties
block the sear.** A thumb safety, grip safety, and patented combination lock safety permitting operation of the TAC-1 Carbine only when set to a predetermined number.

TAC-1 CARBINE

The TAC-1 Carbine may be ordered disassembled in its own compact carrying case.

Removable buttstock reduces size to 26 1/8" for increased portability at close quarters.

The TAC-1 Carbine is shipped with a standard 30 round magazine (45 ACP) or 32 round magazine (9mm). Optional 5 and 15 round magazines are available upon request.

Specifications

Caliber:	45 ACP or 9mm Parabellum (conversion kit available)
Operations:	Delayed blow back firing from an open bolt
Type of Fire:	Semi Automatic
Overall Length:	35 3/4"
Overall Length without buttstock:	26 1/8"
Barrel Length:	16 7/8"
Weight w/o Magazine:	Approximately 8 lbs.
Loaded Magazine Weights:	2 1/4 lbs. for 30 rounds of 45 ACP 1 1/2 lbs. for 32 rounds of 9 mm 2 1/8 lbs. for 50 rounds of 9mm
Front Sight:	Removable blade
Rear Sight:	Adjustable for windage and elevation with pre-set range guides
Sight Radius:	24 1/2"
